

Practice Test on TMU now available to MAP Trainers

MAP Trainers are now able to access the MAP knowledge pretests in TMU. To do that, the MAP Trainer must log into TMU as the Trainer and:

- Create a student record in TMU using their own demographics
- List themselves in that record as the trainer
- Select a provider that they train for from the Provider list
- Enter a class start date

To assure that the MAP Trainer's (student) file remains active, the MAP Trainer should never enter a training completion date. By simply establishing the record and never "completing" the course, the Trainer will have access to the practice/pretest options indefinitely.
